I ❤️ the way it works...<sup>©</sup>

## Magnum 400RD

Semi-automatic machine for wood slats

The semi-automatic machine type **M400 RD** is designed for punching of holes in wood slats of 25 mm or 35 mm or 50 mm width. Punching of holes is performed by means of foot-operated pedal, which releases the single turn of the punching dies drive shaft. Placing of slats in punching section and removing of pocket is made manually.

### Dimensions of standard holes (In relation to width of wood slats)

- 25 mm - 3 mm x 12 mm
- 35 mm - 4 mm x 15 mm
- 50 mm - 4 mm x 20 mm

Special dimensions of holes available on request.

### ADDITIONAL EQUIPMENT

- Punching stations for side guiding holes

You can find in our offer various machines for wood blinds production:

- manual
- semi-automatic
- automatic.
